Guide to fibre sampling:

1. Choose the same samples site on each alpaca. Use this site for each alpaca, for each year.
2. The sample needs to be only the width of your finger (two fibre bundles or staples).
3. Cut the sample as close to the skin as possible.
4. Place sample in a bag (can be provided by AAFT) and write name/IAR etc on the bag.
5. Send sample bags and Test Request form to:

AUSTRALIAN ALPACA FIBRE TESTING
