----- **End of commodity list** -----

This permit is granted subject to the requirement that fees determined under section 592(1) are paid.

Jo Haley
Delegate of the Director of Biosecurity Date: 01 December 2022

Important information about this permit and the import of goods

Note: This permit covers Department of Agriculture, Fisheries and Forestry import conditions. It is the permit holder's responsibility to ensure all legal requirements relating to the goods described in this permit are met. While the permit holder should rely on their own inquiries, the following information is provided to assist the permit holder in meeting legal obligations in relation to the importation of the goods described in this permit.

Information about this permit

Authority to import

The permit holder is authorised to import the goods described in this permit subject to the listed conditions specified in this permit.

Compliance with permit conditions and assessment and management of biosecurity risk

All imports are subject to biosecurity control and may be subject to biosecurity inspection on arrival to determine compliance with the listed permit conditions and to assess the level of biosecurity risk associated with the goods. Imports that do not comply with the import conditions specified in the permit may present an unacceptable level of biosecurity risk and may be subject to biosecurity measures that may include treatment, export or destruction at the permit holder's expense or forfeited to the Commonwealth.

Additionally, non-compliance with import permit conditions may constitute an offence or contravention of a civil penalty provision under section 187 of the *Biosecurity Act 2015*.

Change of import conditions

The Director of Biosecurity may, in accordance with section 180 of the *Biosecurity Act 2015* vary or revoke the conditions on a permit or impose further conditions.

General information about importing goods

Notification of import

Notification of the import must be provided to the Department of Agriculture, Fisheries and Forestry for all imported goods other than goods imported as accompanied baggage or goods imported via the mail and not prescribed under *the Customs Act 1901*, or where other exceptions specified in the *Biosecurity Regulation 2016* apply. Notification must be provided in accordance with section 120 of the *Biosecurity Act 2015* and Part 1 of Chapter 2 of the *Biosecurity Regulation 2016*. Please refer to '[Sending your goods to Australia](#)' on the Department of Agriculture, Fisheries and Forestry website.

Provision of required documentation

It is recommended that all required documentation accompanies each consignment. Required documentation must be presented to the Department of Agriculture, Fisheries and Forestry for assessment. Airfreight or mail shipments should have all required documentation securely attached to the outside of the package, and clearly marked "Attention Department of Agriculture, Fisheries and Forestry". Documentation may include the permit (or permit number), government certification and invoice.

If the product description on the permit varies from the identifying documentation provided, the goods will not be released from biosecurity control unless evidence is provided to the biosecurity officer that the permit covers the goods in the consignment.

Any documentation provided must comply with the Department of Agriculture, Fisheries and Forestry's [minimum documentation requirements policy](#).

Non-commodity cargo clearance

In addition to the conditions for the goods being imported, non-commodity biosecurity risks are assessed including container cleanliness, packaging and destination concerns, and may be subject to inspection and treatment on arrival. Please refer to the [Non-Commodity Cargo Clearance](#) BICON case for further information.

Fees

Fees are payable to the Department of Agriculture, Fisheries and Forestry for certain services (see the *Biosecurity Charges Imposition (General) Regulation 2016*, Part 2 of Chapter 9 of the *Biosecurity Regulation 2016* and Part 3 of Chapter 11 of the *Biosecurity Act 2015*). Detail on how the department applies fees and levies may be found in the [Charging guidelines](#).

Compliance with other regulatory provisions

Goods imported into Australia may be subject to regulatory requirements under other legislation. It is the permit holder's responsibility to identify and ensure they have complied with all requirements of any other regulatory agency or advisory body prior to and after importation.

Permit conditions

It is the importer's responsibility to ensure that the following permit conditions are met in relation to each consignment. Where more than one set of permit conditions is shown for a good please read each set of conditions to determine which applies to a specific consignment.

1. Unscoured wool from New Zealand

This section contains permit conditions for the following commodity (or commodities):

1.	Goods containing biological material	
	Product Description:	Unscoured wool samples from New Zealand

1.1. Biosecurity Pathway

Import conditions prior to arrival in Australian territory

- a. These conditions allow for the import of unscoured wool sourced from animals resident in New Zealand at the time of collection.

To demonstrate compliance with this requirement you must present the following on an Official government certificate:

A statement that the wool is sourced from New Zealand only.

Import conditions on arrival in Australian territory

- b. The importer or the person in charge of the consignment is required to nominate one of the following procedures:
1. Full unpack inspection of the consignment for contamination with insects, seeds and faeces.
 - 1.1. An inspection of at least 5% of the consignment is required. Consignments must be imported in a manner that facilitates inspection or the importer, or person in charge of the consignment, must nominate an approved arrangement site (AA site) with suitable equipment to allow the consignment to be inspected (e.g. if consignments are imported in tri-packed bales, importers must nominate an AA site with equipment suitable for opening these bales).
 - 1.2. Contamination with insects:
If insects are present, the consignment must be directed for methyl bromide fumigation or phosphine fumigation.
 - 1.3. Contamination with seeds:
If seeds are found (there is a zero tolerance) the consignment will be held pending identification of these seeds. If the seeds are identified as non-permitted seeds, the consignment is subject to scouring at an approved arrangements site. The consignment must be scoured by one of the approved methods listed on this permit.
 - 1.4. Contamination with faeces and/or faecal material:
If faecal contamination is detected, the consignment is subject to scouring at an approved arrangements site. The consignment by be scoured by one of the approved methods listed on this permit.
 - 1.5. If the inspection does not detect non-permitted seeds or faecal contamination, the consignment may be released from biosecurity control.

OR

2. Upon arrival into Australian territory the product must be directed to a class 3.0 approved arrangement site (AA site) for scouring by one of the approved methods listed on this permit. Following scouring the wool may be released from biosecurity control.

c. **Approved Scouring Methods**

1. Scouring at a minimum temperature of 60°C for at least 5 minutes, or
2. Scouring at a minimum temperature of 70°C for at least 3 minutes.

d. **Waste disposal**

Waste may be disposed of as general waste via municipal waste disposal systems.

Waste must not be used, or disposed of, on agricultural land.

Waste must not be allowed to drain into waterways.

Note: These conditions apply to all waste from the imported goods before and after the scouring process.

e. This import permit prohibits the goods to be distributed, sold or used for veterinary or agricultural purposes including stock feed, animal cosmetic manufacture, veterinary therapeutic or vaccine manufacture or environmental use associated with livestock unless approved by the Department of Agriculture, Fisheries and Forestry in writing for specific alternative uses.

f. This import permit prohibits the goods to be distributed, sold or used for aquaculture, fisheries or for bait purposes.

g. **Additional post entry conditions**

Wool waste generated from/during the scouring process at the class 3.0 AA site may be released from biosecurity control provided the following conditions are met:

- The wool waste is transferred to an Environmental Protection Agency (EPA) approved composting site
- The wool waste is subjected to composting at the EPA composting site
- The resulting compost can be used as an ingredient in soil for landscaping and agricultural purposes

Direct application on agricultural land is not permitted

Additional information

h. **Commercial administrative conditions**

Documents must be provided with each consignment which:

1. identify the consignment (if non-personal) e.g. entry number
 2. identify all goods being imported as part of this consignment e.g. invoice or waybill or importer's manifest
 3. describe the goods being imported (where not clear).
- e.g. 1: Product XRab = Purified protein derived from rabbits
e.g. 2: Product AX = Synthetic antibiotic
e.g. 3: Comte = Cheese.

i. Under the [Biosecurity Charges Imposition \(General\) Regulation 2016](#) and Chapter 9, Part 2 of the [Biosecurity Regulation 2016](#), fees are payable to the Department of Agriculture,

Fisheries and Forestry for all services. Detail on how the department applies fees and levies may be found in the [Charging guidelines](#).

- j. In addition to the conditions for the goods being imported, non-commodity concerns must be assessed including container cleanliness, packaging and destination concerns, and may be subject to inspection and treatment on arrival. Please refer to the Non-Commodity Cargo Clearance BICON case for further information.
